Imaging Solutions and Services, Inc. Now a Certified Minolta Solutions Provider

RAMSEY, NJ —November 7, 2002— Promising to bring productive and cost-effective document imaging and document management solutions to businesses in the area, Minolta Corporation's Office Systems Division and Imaging Solutions and Services, Inc. of Memphis, TN, announced that they have become partners. Imaging Solutions and Services, Inc. will sell and support Minolta's electronic publishing systems and micrographic systems.

Brad W. Moritz, chief marketing officer and manager of strategic alliances of Imaging Solutions and Services, Inc., says, "We are looking forward to building a strong relationship with Minolta. Our goal is to provide our customers, such as municipalities, libraries, banks, insurance companies and other businesses with imaging solutions that improve operational efficiencies and deliver cost-effective, efficient and reliable document control and management. The addition of Minolta's world-class imaging products to our product portfolio further enhances the depth of solutions we can provide to our clients."

Bud Murphy, executive vice president and general manager, Business Products Group, Minolta Corporation adds, "Minolta is very pleased to be working with Imaging Solutions and Services, Inc. With their vision and attention to customer needs, we have every confidence that they will be a successful solutions provider to businesses in this area for years to come."

Micrographic Systems

Imaging solutions that offer the optimal return on investment focus on the business need and not technology. That is why that even in an age when digital technology abounds, microfilm is thriving as a complementary technology that benefits organizations of all sizes. For over 70 years microfilm media has gained a deserved reputation for safe, reliable and cost-effective long-term storage of documents. From planetary cameras to analog and digital reader-printers, Minolta has long been recognized as a leader in establishing standards for image quality, reliability and for automated features that make its micrographics products easy-to-use and cost-efficient to own and maintain. Today, government offices, medical institutions, insurance and finance companies, as well as libraries around the world, depend on Minolta film-based imaging for their document imaging needs.

Electronic Publishing Systems

Minolta is a pioneer in publication scanning technology. Its unique, face-up bound publication scanners allow users to make information stored in books and other publications more accessible by producing distortion-free digital images that can be printed, stored on a computer, faxed or e-mailed. Specially designed cradles protect fragile bindings and brittle pages from damage and allow users to scan both pages of a book with ease. With a range of automation features, options and accessories, Minolta's Electronic Publication Systems provide an excellent solution to meet the information sharing and publication scanning needs for businesses and organizations of any size.

Imaging Solutions and Services, Inc.

Imaging Solutions and Services, Inc. (www.issi-online.com, (800) 948-9466) has established a reputation for being client-focused and results driven. It provides clients throughout the United States with unparalleled value in the assessment, design, deployment and ongoing optimization of document imaging solutions and services. As a total imaging solutions provider, Imaging Solutions and Services, Inc. offers a wide array of document imaging hardware, software, integration services, conversion services and systems service and support.

Imaging Solutions and Services, Inc.'s focus on delivering real solutions, not just products, is further exemplified by the recent development of its newest software offering called LandView. This unique software product meets the requirements for simplified retrieval and digital scanning of municipal government land and deed records that are stored on microfilm. LandView joins a growing portfolio of software products that expand and enhance the value a client can realize from document imaging technology.

Imaging Solutions and Services, Inc. is headquartered in Memphis, TN with imaging production centers in Memphis and Chattanooga, TN and technical support and sales offices in Atlanta, GA, Charlotte, NC, Chattanooga, TN, Memphis, TN and Nashville, TN.

Minolta Corporation

For over 70 years, Minolta has applied its talents and resources to create products and services that are essential to the world of imaging. These efforts concentrate on the most important aspects of imaging: the quality of the images, the tools and methods for creating images, and the creation of environments for the application of images. This focus on the essentials of imaging ties together Minolta's key business and consumer product lines: digital monochrome and color printer/copiers, multifunction peripherals, desktop laser printers, cameras, binoculars, optical instruments, software and advanced imaging and sensing technologies.

Minolta Corporation, headquartered in Ramsey, New Jersey, is the largest wholly owned subsidiary of Minolta Co., Ltd., Osaka, Japan. The company's Business Products Group markets and supports office equipment and systems, addressing the ever changing needs of businesses and organizations by providing innovative products for the capture, output and management of images.
