Kodak Info Input Solution

Fast, Smart, Efficient Web-based Capture

A Game-Changer for Business

Information is the fuel that drives your business. You need it to flow smoothly and accurately from every input point to the people and processes that need it. Info Input Solution helps you achieve just that. This powerful web-based solution enables capture for centralized, distributed, and remote locations to validate, index, and route information to the right business applications.

Boost productivity with distributed capture and centralized locations

A browser based solution, Info Input Solution makes it easy to deploy capture solutions across your organization.

- Capable of keeping up with higher volume scanners on capable workstations

- Captures business-critical information via an app on your mobile or smart device and sends documents quickly into your business application

- Maintains productivity even with low bandwidth or no web connection

- Securely stores documents locally for 24 hours with no loss of productivity

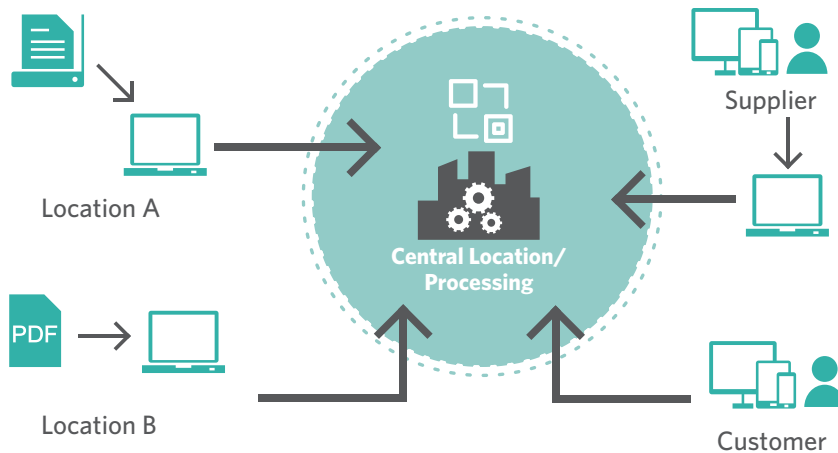

Reliable information, world-class support

Info Input Solution helps ensure that you capture valid, complete information on the first scan.

- Manages challenging documents on the fly with Barcode Reading to automatically deliver accurate data to the right applications

- Determines document type for correct processing after scanning via barcodes

- Validation Scripts and Database Lookups ensure flexibility for administrators to enforce business rules, perform multiple database lookups and validate data

- A range of tools and features such as drag & drop OCR ensures that validation is carried out effectively to minimize rework later

- Simplifies data archiving and ensures a consistent chain of custody across multiple platforms, essential in compliance and audits

"This solution has virtually 100% uptime, which is amazing considering we have over 6,000 users throughout the state responding to requests for vital services."

– IT Director, State Department of Human Services

- Distributed capture
- Feeding into central process
- Multi-channel input
- Batch and Transactional capture
- For ad-hoc and continuous scanning

Maximize efficiency with accurate capture and streamlined workflow

Intelligent features such as advanced indexing and expert extraction get information into your business processes faster.

- Powerful image adjustment tools improve image quality by correcting skewed scans, adjusting contrast, and more
- Multiple indexing options allow you to extract the key information you need
- Users can train the program for faster data extraction from key documents, reducing processing time
- Drag and drop files into different batches
- Enables monitoring of batch status to check details and prevent duplication
- Pushes system upgrades to 1,000s of users instantly

Simple to integrate with your business systems

Designed for simplicity, Info Input Solutions' intuitive user interface requires minimal training and reduces errors.

- Easy to set-up using your existing infrastructure, reducing maintenance costs
- No desktop software required
- Offers centralized, consistent job set-up and configuration with workflow/output available regardless of what platform or device is used
- Connects to Enterprise Content Management, Enterprise Resource Planning, Business Process Management, and workflow solutions
- Exports to any ODBC-compatible database or to a delimited ASCII file
- Deploys new projects in minutes and quickly imports job set-ups from other current systems such as **Kofax**

Scale to fit your biggest big jobs

Info Input Solution gives IT flexibility and future-proofing of the capture solution and integration.

- Grows with your capture needs—from a single department to complex, high-volume enterprise requirements
- One server can support thousands of users, and process billions of pages
- Both **Windows** and **Oracle** database support
- Supports **Windows**, **Linux** operating systems

"The combination of Kodak scanners with this solution has increased our scanning productivity by over 60%."

– Operations Director of a major BPO provider

Alaris IN2 Ecosystem

Today's complex data environment needs an integrated approach to information capture. The Alaris IN2 Ecosystem delivers the best information capture solution for your business with industry-leading scanners, software, and services delivered by a network of trusted partners.

Alaris IN2 Ecosystem gives you the:

- **Right Fit:** Solutions to fit your business goals, environment, and budget

- **Right Experience:** Solutions that simplify your work—from acquisition through operation and ownership

- **Right Results:** Solutions that deliver superior business value through fast, accurate, reliable information capture
